It’s more than a summer internship.

It’s the path to a wide range of career opportunities within financial services.
The RMB summer internship is a progressive program designed to immerse you in our independent, diversified financial services firm through in-depth and hands-on experience—in a way you can't get at a large brokerage or investment bank.

What sets our program apart are the opportunities you'll have to contribute and engage with employees across all departments and levels of our team. We're invested in providing you with practical knowledge that will help you make more informed decisions about the direction of your career. By increasing your understanding of the financial industry and giving you firsthand exposure to roles and responsibilities within our own firm, we help you envision where you'll find the best fit for your own skills and interests.

How does our program work?

Our internship is a 9-week paid program open to college sophomores and juniors.

For sophomore interns
You will get acquainted with our industry and our firm by completing a 2-week rotation through four functional areas in RMB’s Chicago office: asset management, wealth management, business development, and business operations. This holistic program gives you a unique opportunity to explore different potential career paths within the financial services industry and to identify those of greatest interest to you.

For junior interns
You will have a focused foundation for growth by dedicating your time to a specific practice area within RMB. This intensive program gives you the opportunity to develop practical skills through a range of in-depth projects. It provides a firsthand understanding of the typical responsibilities associated with an entry-level job in that part of our business, as well as a glimpse into your potential career trajectory.

Who are we looking for?

Our program aims to recruit top students from top universities. College sophomores and juniors who are working toward an undergraduate business degree or related field are eligible. We seek driven, articulate students with excellent communication skills (both written and verbal) and a strong work ethic. Ideal candidates have a passion for learning, a service mentality, and an interest in pursuing a business career—preferably in the financial services industry.

What makes our program distinct?

As an RMB intern, you will be a full-fledged member of our team and welcomed into our collaborative, entrepreneurial culture. You'll have access to training and development sessions and be included in company, departmental, and client meetings. Our program calendar also includes events that provide opportunities for you to socialize with other interns and employees.

To ensure you get the most out of your internship, the experience is coordinated and supported by a cross-functional committee of employees. Throughout the program, one member of the internship committee will serve as your mentor, giving you a dedicated resource for questions and concerns.

“Sitting in on phone calls with clients and prospects gave me a good sense of what’s really important about wealth management: impeccable customer service.”
-Blake Disiere, Intern, Summer 2014

“Our program calendar also includes events that provide opportunities for you to socialize with other interns and employees.”
-Christopher Yu, Intern, Summer 2015

RMB is a rapidly growing Chicago-based firm with well over 100 employees. We have offices in Denver, Jackson Hole, and Washington, D.C., with plans to expand to additional locations in the future. Our primary practice areas center on providing advice and investments, functions that are supported by a team of professionals who specialize in human resources, marketing, information technology, and more.
Our internship program is designed to deliver the kind of experiences and interactions that can only come from being part of what we do—instead of just looking in from the outside. That’s why we work hard to offer the most immersive, enriching, and engaging experience we can. By doing so, we hope to prepare smart young minds for a bright future in our industry.
